

Singularity Hub

design by  onwired

MODIFICATION DATE	Mon Jan 03 2011
CREATOR	Anthony Zeoli
DESCRIPTION	Web Site Redesign and Development
VERSION HISTORY	<div>singhub_onwired_wf(v8.2)<ul style="list-style-type: none">- Revised how Category is displayed in the sidebar for popular posts to reflect the fact that category titles are different widths.- Added Invite A Friend functional specs, pgs. 21-25- Revised Debate Central to add descriptions, 2 lines of text, and Facebook icons, as well as add Fading Starts section.- Assored minor fixes- Added log in to submit a story form.</div>

[illegible]

Notes:

- 1. Login**
User may register or log-in (see pg. 3) normally or with Facebook Login.
- 2. Advertisement**
720 x 90 banner advertisement.
- 3. Search**
User may perform search with any post in the system. Search results page not displayed.
- 4. Featured Image**
Single featured image from featured story.
- 5. Display comments on Featured Story**
Display num of comments with link to comments. On click, user may view comments on single article page (pg. 10).
- 6. Category**
Display Category name, then link to Category landing page and display all recent articles in category (pg. 11).
- 7. Category Name**
Display name of category assigned to article. Resize accordingly.
- 8. Hot Around The Web**
User may vote up or down the hottest stories contributed to the system. Display top 8 stories from Syndication Hub (pg. 18). Display num of points earned, time from post entry time, and num of comments.

[illegible]

Notes:

1 Login Pop-Up

1. Login Pop-Up
User may log in or request new password. On log in true, display user avatar, profile link, and log out (pg. 5). If user click for password, return form to request new password (pg. 4). On user submit email, return password confirm message (pg. 5)

[illegible]

Notes:

- 1. Reset Password**
 User may enter email address. Send password reset instructions. Confirm send (pg 5)

Take your hand off your computer mouse, Pranav Mistry from MIT is ready to make it disappear. He's designed "mouseless" – an infrared system that tracks your hand motion and translates it to cursor movement on your screen. By simply holding your hand in a curved position you can point and click, right-click, scroll, and drag, with nothing but open air. The cost of the system (in parts) is just \$20. This is another very cool user interface solution from Mistry, who has earned widespread acclaim for his Sixth Sense personal augmented reality system. Check out a cutesy demo for mouseless in the video below. The real action begins around 1:02.

Most user interface designers seem to agree that the mouse and keyboard arrangement that's been popular so far can only last so long. No one knows, however, what exactly will replace it. Gesture technology is leading the pack, with video game and TV applications coming out this year. There's a certain appeal to waving your hands in the air and controlling your machines like some sort of conductor of a robotic orchestra. The more versatile of these systems are dependent on gloves for the moment, but they'll likely drop that restriction in the next few years. Mistry's mouseless project is already a step in that direction, letting you use nothing but your hand to control your computer.

The ease in which you can use the mouseless setup belies it's rather ingenuous system of hardware and software. A small infrared laser is fitted with a line cap so that it projects a thin plane of illuminating IR light near the flat surface it's resting on. Your fingers catch and reflect this light and give off an IR glow. An infrared camera picks up the glowing points of light and computer vision software translates their location and configuration into commands for the cursor. The computer can distinguish between general movements, tapping with index or middle finger (which it translates as left and right clicks), flexing of all four fingers (used as a scroll feature), and a pinching motion used to drag and drop.

I'm sure that Mistry and others will find some good uses for a mouse-like gesture control system that costs just \$20. Yet the real story is likely to be the future devices that Mistry builds using the IR laser and camera technology. That tech might be able to make the controls of Sixth Sense more robust, it could convert normal monitors into touch screens, or it could make any surface interactive.

SCIENCE & TECHNOLOGY NEWS

[illegible]

Notes:

- 1. (Has been removed)**
- 2. Toggle Profile Page or Subscriptions Page**

This is part of the WordPress system. When a user views their profile, they can toggle between their Profile page or their Subscriptions page.

The Subscriptions page is added by the Subscribe2 post notifications plugin, so that users may be able to subscribe to post notifications by:

 - a. any post
 - b. daily digest
 - c. weekly digest

It is recommended that users are subscribed to posts by default, and they may include their preference by checking a box on the registration page (not shown) or by navigating to their Profile and editing their options.
- 3. Facebook Connect after User Registration**

The user may tie their profile to Facebook by clicking on this button, which is included in the Profile page by the Simple Facebook Connect plug-in.

Once activate, the user account will be connected. In testing, could not get to display Facebook data. Will need to work on this in development.
- 4. User Name**

The user name is set on registration and cannot be changed.
- 5. First, Last, and Display Name**

In the admin, a registered user may add his/her full First / Last Name, then select how name is displayed. WordPress will offer variations.

All users at this level are "subscribers" and cannot contribute.
- 6. First, Last, and Display Name**

WordPress provides a password strength indicator.
- 7. Tell A Friend Module**

The user may use the module to the right to Tell A Friend About S-Hub.

The sidebar must be "widgetized" by the developer and you can add this addition as a widget to the sidebar.
(See `singhub_onwired_wf([open-inviter].pdf` for functionality.)

Singularity Hub

SCIENCE & TECHNOLOGY NEWS

Notes:

1. Notification Page

Using Subscribe2 plugin, user may register for Post Notifications and receive email through the system of all new posts to any category or subscribed category.

2. Automatic Receipt

This is not a function of Subscribe2. I have added this so the user can disable post notifications. Will have to build this in custom.

3. Email Newsletter

I have added these buttons to enable the user to turn on/off email newsletter.

Notes on this service:

a. If using Constant Contact plug-in, user may sign-up for newsletter and be added to Constant Contact directly via the integrated API. If we can use the API to turn on/off a users email newsletter, that would be ideal.

b. Partner and 3rd party notifications are not tied to the system at this time. They have been added to show the possibility of notifying partners and 3rd parties that the user should be registered to their email list. For discussion with client as to whether is important or not.

NOTE: The Subscribe2 plug-in features a display option on the user registration page. This must be turned on in the Subscribe2 admin under Settings - Subscribe2.

All registered subscribers may be managed under Settings - Users - Subscribers.
